Gurkan UCAR
~ Java Backend Developer

Hello, I'm Gürkan. I started my software developer career before high school. Until this time I developed many projects on different platforms also I have chosen my path. I want to improve myself in java backend development. I am curious and love to learn.

Hobbies

Experience

Bulut MD — Fullstack Developer

During my internship, I took on tasks in real projects. I have worked in both frontend and backend. I actively took part in teamwork while connecting the frontend and backend project. I developed backend with Spring Boot and frontend with React JS.

06/2020 - 03/2021

Education

Completed in **2019**
Edirne Yildirim Beyazit High School

Continues **2019 - 2023**
Trakya University Computer Engineering

Volunteer Work

UMAY Rocket Team — Avionic Team Member

I worked in the team of avionics and ground station. Here I learned to be a good team player and project planner. I improved my communication skills and took responsibility.

11/2019 – 04/2021

IOT Trakya — Robotic Instructor

I volunteered to teach Arduino and Robotics. We made robotic projects with our participant friends and completed the training. Thanks to this training, I learned how to prepare presentations effectively and improved my public speaking skills.

11/2019 – 01/2020

Achievement

Yasam Kafesi (Cage of Life)

We designed this project after the Corlu Train Accident on 8 July 2018. With this project in train journeys, people are not thrown out of the windows when the train overturns and possible loss of life is prevented. I won 3rd place in the competition organized by the Trakya Development Agency.

04/2019

Projects

Bir Hedefim Var
(I Have a Goal)

With this project I helped to many students, especially myself, who are preparing for university exam. (Available on Google Play Store)

GraphQL Java To-do App

In this project, I developed a simple frontend for adding new tasks or other operations. I used java spring boot graphql and react js. It is open-source and available on Github.
